SUMMARY

Started on the self-taught route back in 2020, building efficient web applications and always eager to learn.

PROJECTS

Zimo — An X clone

Zimo Social - Twitter Clone

An X clone built with Django, HTML and CSS.

Before Twitter became 'X,' I tested my abilities by trying to create a clone, the first attempt didn't but this one did. Its features include; Posting, Liking, Commenting, Saving, Group chat and Direct Messaging

BoredBank — A Banking App

This was a side project I did to explore how online banking works, I incorporated a chat feature, an account could send to or request from another account, while still allowing for dialogue between both.

MEMO — Notes taking and Tasks app

Built with Django, HTML and CSS.

I always had a love for note-taking apps and to-do lists so I decided to make one for myself, learned a lot from the project at the time and it still is one I am really proud of.
